

Anti Slip Stair Tread Covers

Our pre-formed **anti-slip stair tread covers** are a fast and convenient way to provide solid, slip-resistant footing for existing stairs. They can be installed over existing wood, concrete or metal steps by bonding, screwing or bolting into position for immediate use. Standard nosing for these covers is a highly visible yellow.

GRP Stair Tread Covers For Slippery Steps, Anti Slip with Yellow Nosings. Order Now, Ex Stock.

Fibreglass Stair Tread Covers

The proven gritted, maximum anti-slip **Fibreglass Stair Tread Covers** surface has one of the highest degrees of slip resistance ever measured for a walking surface, especially in wet and oily work areas.

All our new Fibreglass Stair Tread Covers are designed and engineered to provide an effective solution to the problems associated with Slippery Steps.

GRP Step Covers

The high quality **GRP Step Covers** are manufactured from a corrosion resistant Isophthalic Polyester resin, with an extremely hardwearing Silicon Carbide gritted Non-Slip top surface, and are designed for both interior & exterior applications.

The High Visibility Yellow nosing highlights the leading edge of the step, and the low profile characteristics of the Tread Cover allow it to be fitted to new or existing, Metal, Concrete, or Timber steps, only increasing the overall step height by 4.8mm.

In addition to improving safety standards, our Fibreglass Tread Covers provide excellent chemical resistance, are easy to install and offer long term durability. The gritted anti-slip surface has one of the highest degrees of slip resistance ever measured for a walking surface. Consideration should be given to installing Fibreglass Reinforced Plastics Stair Tread Covers, Fibreglass Reinforced Plastics Stair Covers, Stair Treads, Fibreglass Reinforced Plastics Steps, Glassfibre Stair Tread Covers, GRP Stair Tread Covers, Non Slip Stair Tread Covers, Fibreglass Stair Covers, FRP Stair Tread Covers, and Glassfibre Anti Slip Grating. Please ask us for our recommendations if you are self installing.

Applications

- Covers existing stairs
- Covers wood, concrete, metal
- High Footfall areas
- Commercial Use

Benefits

- Anti slip Surface
- High visibility nosing
- Chemical resistant
- Fast installation

Sizes

- 4.5mm and 6mm thickness
- Up to 3.66mtrs
- Depth up to 345mm
- Tread sizes cut to suit

British Standard Test Results

The B.S. 4592 test was devised to test and assess the slip resistance of industrial type flooring intended for use in water and wet areas. A co-efficient of friction (CoF) is calculated by determining the mean angle of inclination that an operator can safely maintain when the flooring is subjected to a continuous stream of water.

Green - GRP Stair Covers

Grey - steel grating

Blue - Chequer plate
